# SUBJECT INDEX

Ability
  development 879
  grouping 311
  intervening variable, IRT 192
  self-concept 917, 921, 937, 940
  testing, computerised 175
Academic attainment, cross-cultural 581, 586
Academic development 409
Accelerated programs 314
Achievement
  affective variables 915
  hearing impaired students 547, 565
  meta-analysis related factors 713
  motivation 915, 919
  peer interaction and learning in small groups 23
  quality of instruction 895
  school effectiveness 742
  schooling 883
  self-concept 936
Adaption of instruction to aptitude 871, 904
Adaptive testing 181
Adjunct questions, meta-analysis 292
Adult–child interactions 624, 628
Adult development 355, 370
Advance organizers, meta-analysis 291
Affective variables and achievement 915
Age
  job satisfaction 367
  junior school attainment 761
Apprenticeship 84
Aptitude development 869
Aptitude treatment interactions 921, 924
Arithmetic
  problem solving in and out of school 641
  school and classroom characteristics 777, 782
Aspirations, handicapped youths 515
Assessment of learning, social construction of questions 671
ASVAB paragraph comprehension test 197
Attainment, school effectiveness 742
Attitudes
  pupils 595, 760
  teachers 439
Audio-tutorial instruction, meta-analysis 285
Autobiography, teachers 403
Autonomous thinking 578

Basic Mathematics Test 756
Behavioural objectives, meta-analysis 293
Behaviour and attainment 760, 761
Belief–behaviour relationship 657
Benchmark items 157
Best-evidence synthesis 255
BICAL 164
Bilingual education, meta-analysis 322
BILOG 136
Black women teachers 387
Block designs 477
Bloom, B. S. 280
Box-scores 238
Burnout 374

California Assessment Program, IRT models 156
Cardiff program 801
Career
  development models 366, 517
  entry 349
  expectations, handicapped youths 515
  progression 343, 348, 424, 461
  redefining in mid-life 394
Caroll's model 699, 711
Case studies 480
Causal modeling 908, 917, 936
Causal predominance 917
Causal relations, judgement 484
Central conceptual structure 847
Centre for Assessment of Demographic Studies 548
Centre for Studies in Education and Human Development 548
Change agents 801
Character development 660
Classroom
  contextual approach to peer interaction 114
  culture 80
  differences and achievement 921
  effectiveness 698, 782, 786, 789
  grouping 311
  interaction, mathematics 647
  organization, meta-analysis 309, 331
  talented learners 314
  transmission and display of learning 673
Classroom Environment Study 902
Class-size, self-concept 309, 939
Coding of study features 259
Cognitive actions genesis, joint activity 627
Cognitive constructions, psychosocial mechanisms 607, 617
Cognitive development 830
  affective student characteristics 915
  neo-Piagetian theory 836

quality of instruction 896
Cognitive functioning 614
Coleman's theory 816
Collaborative autobiography, teachers' knowledge 403, 413
Collaborative learning
knowledge acquisition 41
negative effects 89
structuring interactions 49
teachers 48
writing tasks 101
Collaborative problem solving 60
Collaborative writing 101
Combined tests 235
Communication, teachers/pupils 765, 766
Community, learning environment 85
Comparison-group pretest–posttest design 479
Competence 675, 678
Complex instruction 12
Component latent trait models 190, 193
Composition
collaboration 106
development 845
Computer-based instruction, meta-analysis 277, 284, 329
Computerized ability testing 175
item response models 178
procedures 179
Computerized adaptive testing 123
Conceptual structure 847
Context–process relationships 906
Contingency theory, school effectiveness 694, 703
Conversation, mother–child 666
Cooperative learning 6, 11, 15, 56, 114, 632
Cooperative peer instruction 59
Cooperative peer interaction 56, 58
Coping strategies 602
Co-responding 103
Correcting, collaborative 109
Corrective activities 444
Correlations as outcomes 241
Criterion-referenced testing, IRT models 145–160
Cross-age tutoring, meta-analysis 286
Cross-cultural comparisons 581
Cross national school effectiveness indicators 789
Cultural identity 592
Cultural influences on learning 84
Cultural transmission 57
Curricular innovation, meta-analysis 299, 330
Curriculum-specific achievement tests 743
Customized testing 147, 156

Deputy head 765
Desegregation programs, meta-analysis 323
Development
affective student characteristics 915
aptitude 869
children's narrative compositions 835
information processing capabilities 861
mothers' social representations 657, 659
neo-Piagetian theory 836
organization of joint actions 623
quality of instruction and achievement 895
self-concept 933
teachers 358
Developmental genetics 830
Diagnostic competence of teachers 904
Didactic contract 672, 675
Direct instruction 700, 924
Disabled students 467–572
career expectations 515
hearing impaired 547
methodological issues 563
outcome of schooling 567
post-school employment patterns 501
research methods in special education literature 473
school-to-work transition 473, 489, 533
Discovery learning 13
Discriminant analysis
career aspirations 523
labour market, handicapped students 505
Disengagement, teachers 354, 462
Diversification, teaching career 351
Dropouts 503
handicapped students 504, 507, 565

Early retirement 374
Ecological validity 476
Edinburgh Reading Test 756
Effectiveness 685–825
Cardiff programme 801
classroom characteristics 698, 777
conceptual models 691
differential 769
indicators across nations 789
interpretation of results 741
junior schools 753
longitudinal multilevel data 721
quality of instruction 897
research syntheses 707
school improvement 815
secondary schools 769
Effect size 263, 745
Elaboration
help-giving 28
help received 25
social-structural characteristics of task 115
student ability and personality 33
Empathic cognition 848, 850
Employment, handicapped and nonhandicapped students 501, 515
Employment patterns, time 422
England
primary teachers' careers 391
secondary education 582
Environment
experimental validity 475
individual learning 71
intellectual activity 623

school effectiveness 711, 764
self-concept 938
Epistemology, small group learning, mathematics 77, 81
Equating models, robustness 169
Equating testscores, IRT 161
Equity, meta-analysis 319, 331
Ethnic groups, school effectiveness 772, 775
Exemplary Center for Reading Instruction 444
Experimental designs 477
Expert roles 34
Exposure, achievement of hearing impaired students 554
External validity 474, 476

5-Factor model, school effectiveness 692, 789
Faculty evaluation programs 305
Feedback
level of elaboration 31
mastery learning 444, 447
meta-analysis 295
Feeling items 849, 851
Focused tests 253
Frames 651
France, secondary education 583
Free rider 94
Free school meals 774

Ganging up, teams 95
Gender
achievement, meta-analysis 319
conditioning 600
group learning 33
school effectiveness 761, 772
General component latent trait model 196
General education 863
Generativity 371
Glass, G. 227
Goal coordination 703
Goals, common and individual 870
Goals in problem solving in and out of school 638
Good information processing 858
Goodness-of-fit studies 147, 215
Good Strategy User Model 857
Graduate Management Admissions Test, IRT test-score equating 165
GRAPHER 72
Graphic organizers 292
Grouping, meta-analysis 311
Group learning 11, 21
group composition and ability 31
knowledge acquisition 43
negative effects 89
rewards 32
Group synergy 72
Growth modeling 428, 432, 728
Guessing 210
Guided participation 17

Handicap, definition 503, 563
Handicapped youth 467–572
career expectations 515
hearing impaired 547
methodological issues 563
outcomes of schooling 567
post-school employment patterns 501
research methods in special education literature 473
school-to-work transition 473, 489, 533
Hatties' model of educational productivity 711
Hazard function, teachers 425
Head teacher, school effectiveness 764
Hearing impaired students
achievement patterns 547, 565
school-to-work transition 489
Hedges, L. V. 243
Help-giving 28
Help received 24
elaboration 25
Help-seeking 114
Hierarchical linear model 723, 728, 736
High-risk students, programs for 321
High School and Beyond 469, 482, 490, 502, 518, 564
Home environment 710, 732, 734
Horizontal equating 161
Hunter, J. E. 251

Identity 595, 943
Imitation 609
Improvement programme 801, 815
Incentives, group participation 12
Individual development, aptitude 869
Individual growth
modeling 723
school effects 728
Individual goals 870
Individual learning packages, meta-analysis 282
Individuation 356
Information gathering techniques 481
Information processing
latent trait models 189
promotion of 857
Information System Work and Analysis of Change 176
Inner London Education Authority
junior school effectiveness 753
senior school effectiveness 769
Inquiry curricula in science, meta-analysis 300
Inquiry methods of teaching in science, meta-analysis 304
Inservice teacher training programs, meta-analysis 303
Instructional adaption 871
Instructional context 905
Instructional design, meta-analysis 291, 330
Instructional effectiveness 709
indicators across nations 789
Instructional quality and achievement outcomes 895

Instructional systems, meta-analysis 277, 329
Instructional texts, meta-analysis 291
Integration, hearing impaired students 548, 553
Intellectual development 836
  joint activity 623, 629
  socio-cognitive conflict 611
Interaction patterns 653
Interaction strategies 602
Interactive problem solving 614
Internalization 43, 355
Internal validity 474
IPI 283
Item bank calibration 179
Item bias 127
  definition 128
  detection 130
  evaluation 137
  explanation 139
Item response theory 123
  computerized ability testing 178
  criterion-referenced measurement problems 145
  future directions 205
  information-processing approach to testing 189
  item bias 127
  Rasch model 131, 168, 193, 194, 210
  test score equating 161
  two- and three-parameter models 132, 148, 207, 168, 195
Item selection, CRT 152

Japan, secondary education 583
Jigsaw teaching 12, 34
Job satisfaction 363, 399, 463
Job Training Partnership Agencies 510
Joint action organization 623
  cognitive actions genesis 627
  cooperation 632
  intellectual development 629
Joplin plan 314
Judgement within quasi-experimentation 484
Junior schools, effectiveness 753

Keller Plan 223, 279, 699, 709
Keying 651
Knowledge acquisition
  collaboration in 43
  teachers 405
  teachers' and learners' roles 46

Laboratory skills 301
Language, effect of school and classroom characteristics 777, 785
Latent trait models 189, 192, 206
  application 197
  component 193
  conceptual framework 190
  general component 196
  linear logistic 194
  multicomponent 195
Leadership, school effectiveness 764
Learning disabled students, school-to-work transition 489
Learning environments 72
Learning for Mastery 280
Learning models 699, 711
Learning-Process-Test 930
Learning, social factors 573–684
  construction of questions 671
  mathematical practices and goals 637
  models 597
  mothers ideas 657
  psychosocial mechanisms of cognitive constructions 607
  organization of joint actions, child development 623
  routines 647
Life cycles, teachers 347, 403, 455
Linear logistic latent trait model 194, 201
Linking items 166, 170
Listening comprehension 42
Local Education Agencies, resources for handicapped students 533, 535
Logic of evidence 484
Logico-mathematical operations 835
LOGIST 132, 163, 164, 168
Longitudinal data, school effectiveness 721, 733
Longitudinal research 480
LVPLS 908, 917, 919

Mainstreaming, handicapped students 469, 547, 567
Management, school effectiveness 703
Mastery learning 444, 699, 700
Mastery testing, meta-analysis 297
Mastery threshold 157
Mathematics
  epistemology 81
  group interactions 72, 80
  hearing impaired students 547
  models of education 647
  peer interaction 55
  practices and goals 637
  schooled and nonschooled children 883, 888
  school effectiveness indicators across nations 789
  self-concept of ability 917
Meanings, mathematical 647
Media-based instruction, meta-analysis 285
Memory capacity 859
Meta-analysis 481
  antecedants 235
  class and school organization 309
  concept 227
  curricular innovation 299, 330
  design and publication features 269
  educational productivity 709, 715
  equity 319
  guidelines for 257
  Hedges' modern statistical methods 243

instructional design 291, 330
instructional systems 277, 329
lessons from 327
Rosenthals' methods 253
Slavin's best evidence synthesis 255
teacher education and evaluation 303
Mid-life crisis 352, 356, 365, 370, 395
Mindfulness 89
Mismatching 597, 599
Mixed linear models
individual change 723
multilevel effects 726
Mother–child verbal interaction 666
Mothers, social representations of childrens development 657
Motivation 865, 915
cooperative learning 15
Multicomponent latent trait model 195
Multidimensional responses, IRT 213
Multilevel research, school effectiveness 721
Mutuality, peer tutoring 11

Narrative composition, development 835, 838
National Assessment of Educational Progress 469
IRT models 156
National Center for Education Statistics 502
National Longitudinal Study 469
Nationality, level of attainment 590
Natural experiments 479
Neo-Piagetian theory of cognitive development 836
Netherlands
school effectiveness research 694, 695, 777
teacher satisfaction and stress 367
New mathematics, meta-analysis 299
Norm distributions 183

Occupational choice 365
Office of Special Education and Rehabilitative Services 470, 509, 534
One group pretest–posttest design 478
Open education, meta-analysis 287
Open enrolment 754
Opportunity and achievement, meta-analysis 321
Opportunity to learn 699
Opportunities to teach model 599, 601
Organizational theory
models 696
school effectiveness 693
Organization of joint actions 623
Orthopedically handicapped students, school-to-work transition 489

Paragraph comprehension test 197
Parallel careers 399
Parents
child development and learning 658
expectations 522
school effectiveness 767
Partial Credit Model 178
Patterns of interaction 653
Peer collaboration 13, 41, 55, 58
Peer groups, self-concept 937
Peer interaction 5, 612, 614
approaches to 9
classroom contextual model 113
collaborative writing tasks 101
learning in small groups 21
negative effects 89
social construction of mathematical knowledge 55
teacher collaboration 41
Peer tutoring 9, 11
meta-analysis 286
Percentages as outcomes 239
Perception and aspiration 595
Perseverance 699
Personalised System of Instruction 223, 279
Personal knowledge 406
Personal responsibility, teachers 442
Peru, schooling and achievement 883
Piaget's theory 611
Planning 859
PML 131
Polychotomous Rasch model 215
Postlethwaite, S. 285
Poverty 732
Prematched control group design 479
Primary teachers careers 391
Prior knowledge 860
Problem-solving
collaborative 23, 60
goals and practices in and out of school 638
interactive 614
social situations 613
Process approach 845
Process–product research 901, 904, 908
Professional identity, teachers 349
Programmed instruction 277, 283
Progress, junior school 759
Proleptic instruction 57
Promotion 370, 396
Proofs 639
Proportional hazards model 427
Proximal development 57
Psychosocial mechanisms of cognitive constructions 607

Quality of instruction, achievement outcomes 895, 899
Quasi-experimental designs 477, 483
judgement within 484
transition studies 486
Questions and answers, social construction 671

Race and achievement 600
meta-analysis 320
school effectiveness 755, 761

Rasch model 131, 167, 169, 193, 194, 210
Reading
  hearing impaired students 547
  schooled and nonschooled children 883, 889
*Reading Aid* 90
Reciprocal teaching 41, 48
Redoublement 583
Rehabilitation agencies 510
Referential communication 609
Research methods, special education literature 473
Residual change-scores 431
Responsibility for Student Achievement 442
Returners 399
Reviews, meta-analysis 223
Reward structure, group learning 32
Rosenthal, R. 253
Routines 647, 652

Satisfaction among teachers 363, 399, 463
Scaffolding 57
Scale scoring 184
Schmidt, F. L. 251
School based study 803
School effectiveness 685–825
  Cardiff programme 801
  classroom characteristics 698, 777
  conceptual models 691
  differential 769
  indicators across nations 789
  interpretation of results 741
  junior schools 753
  longitudinal, multilevel data 721
  research syntheses 707
  school improvement 815
  secondary schools 769
School improvement
  Cardiff programme 801
  U.S. 815
School management 368
School organization, meta-analysis 309
School and self-concept 936
School socialisation 938, 941
Schooling and achievement in Peru 883
Schools as workplaces 379
School-to-work transition, handicapped youths 489, 501, 515, 533
Science
  gender, race and achievement 319
  inquiry curricula, meta-analysis 300
  teacher training 304
Score reporting, IRT models 156
Secondary school effectiveness 769
Second International Mathematics Study, school effectiveness 790
Self-concept of ability 917, 921, 933
Self-directedness 411
Self-esteem 582, 584, 592
Self-image 602
Signs objects 633
Slavin, R. E. 255, 259, 281
Small group learning 21, 71
Social climate, self-concept and achievement 938
Social clock 358
Social constructivist theory 56, 57
Social development 409
Social factors in learning 573–684
  construction of questions 671
  correlates of low academic attainment 581
  mathematical practices and goals 637
  mechanisms of cognitive constructions 607
  models 597
  mothers ideas 657
  organisational of joint actions 623
  routines 647
Social identity 584
Social interaction 609, 611
Social marking 610, 611, 615
Social self-concept 935
Social significance 610
Socio-cognitive conflict 611, 612
Special education 469, 568
  hearing impaired students 547
  research methods in literature 473
  school-to-work transition 489, 501
  vocationally-related programmes 533
Speech disabled students 489
Stability of school effects 747
Stabilization, teachers 349
Staff development 443, 446
State-of-the-art meta-analysis 251
Status differential effects in teams 95
Story telling, development 838
Strategies, teaching of 864
Strategy use 858, 860
Stress, teachers 363, 412
Structuring cues 904
Student ratings, teacher evaluation 305
Student-teams achievement divisions 12
Subject–object interactions 628
Success 356, 408, 582
Sucker effect 94
Survival analysis, teachers 424
Sustaining Effects Study 728

Tajfel–Turner theory 548, 591
Talented learners, grouping 314
Task–interaction relationship 102
Teachers
  attitude and perceptual change 439
  education, meta-analysis 303
  effectiveness 898
  employment patterns 422
  evaluation, meta-analysis 305
  history 379
  Holland 367
  job satisfaction 363, 399, 463
  knowledge, collective autobiography 403
  life-cycles 343, 348, 403, 455
  perspectives 456
  primary, careers 391
  relation to young people 370

school effectiveness 765, 785
stress 363, 412
student self-concept 937
Teacher–student interaction 647, 672, 678
Teaching and learning models 597
Team learning 11
negative aspects 89
Test anxiety 919, 923
Test features, meta-analysis 294
Test feedback 295
Test frequency 294
TESTLEN 151
Test score equating, IRT 161–172
Test score interpretation, IRT 184
Test systems, computerized 176
Thematical procedures 653
Thinking and planning 859
Time on task 699
hearing impaired students 554
Time, teacher career paths 421, 458
Tracking 583
Transfer after narrative training 849
Transition model 509
Transition studies
career expectations 515
high school seniors with special needs 489, 501
research methods in special education literature 473
resources available to handicapped students 533
Tutoring 609
meta-analysis 286
United States
handicapped youth and their schooling 467–572
history of teachers 380
school improvement 815

Validity 474
external 476
generalization 251
internal 475
Variance component analysis 792
Verbal reasoning, school effectiveness 773
Vertical equating, IRT 162, 167, 168, 171
Vocational education, handicapped youths 534

Walberg's model of educational productivity 708
Women, obstacles in careers 395
Women's history 386
Work-centred environment 766
Working conditions and job satisfaction 369
Working interim 652
Writing
development 845
junior schools 756
peer collaboration 43, 101
*Writing Aid* 91
